

ULTRA-PULSE

delivering healthy alternatives

Product Description:

UltraPulse Fiber is a natural ingredient, made in Australia from locally grown chickpeas that are free of any genetic modification. High in dietary fiber and other nutritional components, it is an environmentally friendly, healthy, and cost-effective alternative to other commercially available fiber sources.

Product Value Benefits:

UltraPulse Fiber provides food manufacturers the opportunity to incorporate a cost-effective source of high dietary fiber into innovative and healthy food products.

Product Use & Application:

UltraPulse Fiber can be incorporated into processed foods to enhance nutritional properties and/or serve as a functional ingredient. Product flavor and aroma are not affected by the incorporation of UltraPulse fiber.

Pack Size:

Product is available in the following pack sizes:

- 1 tonne bulk bags
- 55.11lbs (25Kg) multi-walled, paper bags

Storage Conditions & Shelf Life:

12 months from date of manufacture (store in cool & dry conditions).

Chickpea Fiber

Nutrition Analysis per 100g quantity

Fiber	per 100g
Analytical data	Result
Dietary Fiber	minimum 75g
Protein	3-5g
Fat - total	0.5g
Carbohydrate - Sugars	3g 0.2g
Potassium	>700mg
Sodium	<10mg
Ash	3-4g
Moisture	<10g
Gluten	<3ppm
Particle Size >700 micron	maximum 2%
